Variable Multi Flow

VMF

- **EUROVENT EFFICIENCY'S CLASS "A" IN HEATING OPERATION**
- **HIGH EFFICIENCIES ALSO AT PARTIAL LOADS**
- **FAST AND EASY INSTALLATION**

Characteristics

Reversible heat pumps for external installation for the production of chilled/heated water with high performance and low electric absorption scroll compressors, axial fans, external copper coils with aluminium fins, system-side plate heat exchanger. In the units with desuperheater, but in cooling-only operation, it is possible to produce free hot water. The basement, the structure and the panelling are in steel treated with polyester anti-corrosion paint.

Version

- NRL_H** Standard heat pumps
- NRL_HL** Standard heat pumps Low noise version
- NRL_HA** High efficiency version
- NRL_HE** High efficiency version Low noise version

Operating limits: Work at full load down to -15°C external air temperature in winter season, up to 46°C in summer season. Hot water production up to 55°C

(for more details please refer to the technical documentation)

- Units with two refrigerant circuits designed to reach the maximum performance at full load, granting high efficiencies also at partial loads and assuring continuity in case of stop of one of the two circuits.
 - Flow switch, water filter and high and low pressure transducer are standard supplied.
 - Possibility of integrated hydronic kit which includes the main hydraulic components; it is available in different configurations with or without buffer tank, one or two pumps high and low head.
 - Microprocessor adjustment, with keyboard and LCD display, for easy consultation and intervention on the unit via a menu available in several languages.
- Adjustment includes complete management of the alarms and their log.

- The presence of a programmable timer allows setting time bands of operation and a possible second set-point
- The temperature control takes place with the integral proportional logic, based on the water output temperature.
- Night Mode: it is possible to set a silenced operation profile. Perfect for night operation, since it guarantees greater acoustic comfort in the evenings, and a high efficiency in the time of greater load.

Night Mode is standard on all low noise versions. For all other versions either the DCPX accessory or "J" inverter fan must be specified to allow Night Mode to operate.

Accessories

- **AER485P1:** RS-485 interface for supervising systems with MODBUS protocol.
- **PGD1:** Simplified remote panel. Allows control of basic unit functions and alarm notification.
- **MULTICHILLER_PCO:** Control system to switch the individual chillers on and off, and command them, in a system in which several units are installed in parallel, always ensuring a constant delivery to the evaporators.
- **AERWEB300:** Accessory AERWEB allows remote control of a chiller through a common PC and an ethernet connection over a common browser; 4 versions available: AERWEB300-6: Web server to monitor and remote control max. 6 units in RS485 network;

AERWEB300-18: Web server to monitor and remote control max. 18 units in RS485 network;

AERWEB300-6G: Web server to monitor and remote control max. 6 units in RS485 network with integrated GPRS modem;

AERWEB300-18G: Web server to monitor and remote control max. 18 units in RS485 network with integrated GPRS modem

- **DCPX:** Device for condensation temperature control, with continuous speed modulation of fans by using a pressure transducer.
- **GP:** Protective grille. Condenser coil external protection against accidental or hail damage.
- **VT:** anti-vibration support, to be fitted below the sheet metal base of the unit.

Accessories factory fitted only

- **DRE:** Current soft starter device, Available only with power supply 400V/3N.
- **RIF:** Power factor correction. Connected in parallel to the motor allowing about 10% reduction of input current
- **PRM1:** It is a manual pressure switch electrically wired in series with the existing automatic high pressure switch on the compressor discharge pipe.
- **COMPATIBILITY with the VMF SYSTEM** For more information on the system refer to the manual.

Unit Configurator

By suitably combining the numerous options available it is possible to configure each model in such a way as to meet the most demanding of system requirements.

Field	Code
1,2,3	NRL
4,5,6,7	Size
	0280-0300-0330-0350-0500-0550-0600-0650-0700-750 (3)
8	Expansion valve
	◦ Standard (leaving water temperature down to 4°C)
	X Electronic expansion valve (leaving water temperature down to 4°C) contact head office for lower temperatures (4)
9	Model
	H Heat pumps
10	Heat recovery
	◦ Without recovery
	D With Desuperheater (5)
11	Version
	◦ Compact
	L Compact low noise
	A High efficiency
	E High efficiency in low noise operation
12	Coil
	◦ In aluminium
	R In copper
	S In tinned copper
	V In painted aluminium-copper (epoxy paint)
13	Fans (6)
	◦ Standard
	M Increased
	J Inverter

14	Power supply
	◦ 400V/3N/50Hz with circuit breakers
	1 220V/3/50Hz with circuit breakers
15-16	Hydronic kit (7)
00	Without hydronic kit
01	n°1 low head pump and buffer tank
02	n°2 low head pump and buffer tank
03	n°1 high head pump and buffer tank
04	n°2 high head pump and buffer tank
05	n°1 low head pump and buffer tank (with holes for immersion heaters)
06	n°2 low head pump and buffer tank (with holes for immersion heaters)
07	n°1 low high pump and buffer tank (with holes for immersion heaters)
08	n°2 low high pump and buffer tank (with holes for immersion heaters)
09	double hydraulic circuit
10	double hydraulic circuit with holes for immersion heaters
P1	n°1 low head pump
P2	n°2 low head pump
P3	n°1 high head pump
P4	n°2 high head pump

(3) The size 0280-0300-0330-0350 only available in low noise version "HL/HE" with inverter fans

(4) Options D are not compatible with option X

(5) The desuperheater can be used exclusively in the cold operation

(6) **On / off fan Standard**, standard sizes up 0500 to 0750

On / off fan Increased, option for size up 0280 tu 0350

Fans Inverter, standard sizes from 0280 to 0350, with no static pressure

Fans Inverter, option for sizes from 0500 to 0750 with static pressure

(7) Buffer tanks with holes for additional heaters are supplied from factory with plastics caps of protection, before system's loading, where the installation of one or all the heaters is not provided, it is mandatory to replace plastic caps with special caps, which are commonly available in the market.

Sound power (cooling mode)

Aermec determines sound power values on the basis of measurements made in accordance with UNI EN ISO 9614-2, as required for Eurovent certification.

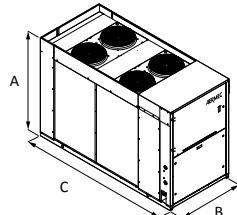

Sound pressure (cooling mode)

Sound pressure in free field, at 10m. distance from the external surface of the unit (in accordance with UNI EN ISO 3744).
