

Aermech adheres to the EUROVENT Certification programme up to 600kW cooling. The products concerned appear in the EUROVENT Certified products guide.

Variable Multi Flow

VMF

**Air/Water Reversible heat pumps for external installation
Scroll compressors, plate heat exchangers and axial fans
Cooling capacity 183 ÷ 470kW
Heating capacity 228 ÷ 526kW**

- **EUROVENT EFFICIENCY'S CLASS "A" IN HEATING OPERATION***
- **HIGH EFFICIENCIES ALSO AT PARTIAL LOADS**
- **FAST AND EASY INSTALLATION**

* HA version, except for sizes 1250 and 1504

Characteristics

Reversible heat pumps for external installation for the production of chilled/ heated water with high performance and low electric absorption scroll compressors , axial fans, external copper coils with aluminium fins, system-side plate heat exchanger.

In the units with desuperheater, but in cooling-only operation, it is possible to produce free hot water. The basement, the structure and the paneling are in steel treated with polyester anti-corrosion paint.

Version

NRL_H Standard heat pumps

NRL_HL Standard heat pumps Low noise version

NRL_HA High efficiency version

NRL_HE High efficiency version Low noise version

Operating limits: Work at full load down to -15°C external air temperature in winter season, up to 46°C in summer season. Hot water pro-

duction up to 55°C (for more details please refer to the technical documentation)

- Units with two refrigerant circuits designed to reach the maximum performance at full load, granting high efficiencies also at partial loads and assuring continuity in case of stop of one of the two circuits.
- Water filter and high and low pressure transducers are standard supplied, The flow switch is standard in all the configurations for compact versions (0800-1200 H/HL), for the other sizes and configurations it is provided only with the hydronic-kit.
- Possibility of integrated hydronic kit which includes the main hydraulic components; it is available in different configurations with or without buffer tank, one or two pumps high and low head.
- Microprocessor adjustment, with keyboard and LCD display, for easy consultation and intervention on the unit via a menu available in several

languages.

Adjustment includes complete management of the alarms and their log.

- The presence of a programmable timer allows setting time bands of operation and a possible second set-point
- The temperature control takes place with the integral proportional logic, based on the water output temperature.
- Night Mode: it is possible to set a silenced operation profile.

Perfect for night operation, since it guarantees greater acoustic comfort in the evenings, and a high efficiency in the time of greater load.

Night Mode is standard on all low noise versions. For all other versions either the DCPX accessory or "J" inverter fan must be specified to allow Night Mode to operate.

Accessories

- **AER485P1:** RS-485 interface for supervising systems with MODBUS protocol.
- **PGD1:** Simplified remote panel. Allows control of basic unit functions and alarm notification.
- **MULTICHILLER_PCO:** Control system to switch the individual chillers on and off, and command them, in a system in which several units are installed in parallel, always ensuring a constant delivery to the evaporators.
- **AERWEB300:** Accessory AERWEB allows remote control of a chiller through a common PC and an ethernet connection over a common browser; 4 versions available:
- **AERWEB300-6:** Web server to monitor and remote control max. 6 units in RS485 network;

AERWEB300-18: Web server to monitor and remote control max. 18 units in RS485 network;

AERWEB300-6G: Web server to monitor and remote control max. 6 units in RS485 network with integrated GPRS modem;

AERWEB300-18G: Web server to monitor and remote control max. 18 units in RS485 network with integrated GPRS modem

• **GP:** Protective grille. Condenser coil external protection against accidental or hail damage.

• **DCPX:** Device for condensation temperature control, with continuous speed modulation of fans by using a pressure transducer.

• **AVX:** anti-vibration support, to be fitted below the sheet metal base of the unit.

Accessories factory fitted only

- **DRE:** Current soft starter device, Available only with power supply 400V/3N.
- **RIF:** Power factor correction. Connected in parallel to the motor allowing about 10% reduction of input current
- **PRM1:** It is a manual pressure switch electrically wired in series with the existing automatic high pressure switch on the compressor discharge pipe.
- **COMPATIBILITY with the VMF SYSTEM** For more information on the system refer to the manual.

15-16 Hydronic kit (5)

- 00 Without hydronic kit
- 01 n°1 low head pump and buffer tank
- 02 n°2 low head pump and buffer tank
- 03 n°1 high head pump and buffer tank
- 04 n°2 high head pump and buffer tank
- 05 n°1 low head pump and buffer tank (with holes for immersion heaters)
- 06 n°2 low head pump and buffer tank (with holes for immersion heaters)
- 07 n°1 low high pump and buffer tank (with holes for immersion heaters)
- 08 n°2 low high pump and buffer tank (with holes for immersion heaters)
- 09 double hydraulic circuit
- 10 double hydraulic circuit with immersion heater
- P1 n°1 low head pump
- P2 n°2 low head pump
- P3 n°1 high head pump
- P4 n°2 high head pump

(3) The option X is not compatible with the option D (only for temperature lower than 4°C)

(4) The desuperheater can be used exclusively in the cold operation

(5) The buffer tank with holes and supplementary electric heaters leave the factory with plastic protection caps. Before loading the system, if the installation of an electric heater is not envisaged it is compulsory to replace the plastic caps.

Sound power (cooling mode)

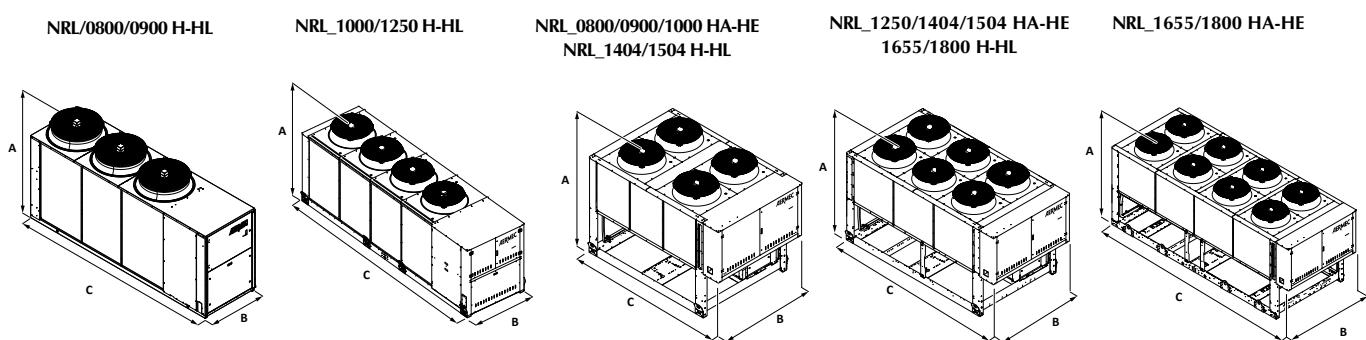

Aermec determines sound power values on the basis of measurements made in accordance with UNI EN ISO 9614-2, as required for Eurovent certification.

Sound pressure (cooling mode)

Sound pressure in free field, at 10m. distance from the external surface of the unit (in accordance with UNI EN ISO 3744).

Note: For more information, refer to the selection program or the technical documentation available on the website www.aermec.com
